Summary

Frontend-focused Software Engineer with 5+ years of experience building scalable, performant web applications using React, Next.js, and TypeScript. Proven track record in leading frontend teams, optimizing UX, and integrating AI-driven features.

Experience

Research Associate Jan 2025 to Current
Upanzi Network - Kigali, Rwanda

- Integrated AI-powered chatbots into web applications, aligning design with usability.
- Designed and implemented CI/CD pipelines, containerized applications with Docker.
- Wrote unit/integration tests, improved test coverage, and conducted peer code reviews to ensure maintainability.

Frontend Engineer Sep 2022 to Dec 2023
Better Mobile Security - Remote, USA

- Led a frontend team in designing user-friendly applications, enhancing security and performance for large-scale
- Conducted code reviews to maintain high-quality, maintainable code
- Collaborated with backend engineers to ensure seamless API integration.

Frontend Engineer Mar 2022 to Sep 2022
DoubleDice - Remote, Belgium

- Developed and maintained scalable frontend architecture using Next.js, TypeScript.
- Integrated Web3 wallet connectivity (MetaMask, WalletConnect) and smart contract interactions to enable seamless crypto transactions
- Led frontend QA efforts, implementing unit tests and end-to-end testing with Jest

Frontend Developer & UI/UX Designer Sep 2020 to Oct 2021
MAD Technologies - Ethiopia

- Delivered client websites efficiently by using WordPress and React projects.
- Designed intuitive user interfaces in Figma & Adobe XD.

Skills

- **Cloud & DevOps:** Docker, Kubernetes, Terraform, GitHub Actions, AWS (Certified Cloud Practitioner), Linux (CompTIA+), CI/CD Pipelines, Infrastructure as Code (IaC), Monitoring & Logging (Prometheus, Grafana)
- **AI & ML:** LLM-powered Applications (ChatGPT, Claude), Retrieval-Augmented Generation (RAG), OpenAI & HuggingFace APIs, FastAPI, Prompt Engineering, Vector Databases (e.g., Pinecone, Weaviate)

- **Soft Skills:** Cross-Functional Collaboration, Agile & Scrum, Critical Thinking, UX-Driven Development, Clear Communication, Time & Task Management
- **Core Competencies:** Full-stack Engineering (React, Next.js, Node.js), DevOps Automation, Scalable Software Architecture, CI/CD Implementation, Technical Leadership & Mentorship, Startup Engineering Culture

Education

MSc, Information Technology (Software Engineering & AI) Aug2023 - May 2025
Carnegie Mellon University Africa, Rwanda

I focused on software engineering, DevOps, and AI with an emphasis on software design, architecture, and scalable systems. My coursework and projects explored distributed systems, cloud-native development, and applied machine learning, combining both research and hands-on practice.

BSc, Electrical & Computer Engineering Sep 2014- Jul 2019
Addis Ababa University, Ethiopia

I specialize in Computer Engineering, with a strong foundation in computer programming, computer architecture, digital logic design, and compilers. The program was highly technical, preparing me with both low-level systems knowledge and practical software development skills.

Projects

Curricula - AI-Powered Academic Advisor Founder, Fullstack

- Built an AI-powered platform to help students plan academic paths aligned with career goals.
- Implemented CI/CD pipelines, wrote tests, and conducted code reviews.
- Led product innovation for an AI-powered academic planning platform
- Collaborated with advisors and faculty, implementing workflows that streamline student-advisor interactions.

Salon Management System Frontend Engineer

- Designed and implemented responsive UI/UX using Next.js and TypeScript.
- Built features for booking, staff management, and salon operations.
- Integrated the backend API and delivered a production-ready web app

AI-Powered Policy Analyzer for Africa Frontend Engineer

- Designed a sleek, professional UI to make complex policies accessible.
- Integrated an AI chatbot powered by LLMs for interactive policy Q&A.
- Ensured responsive design and smooth API integration for user experience.

StayHub - Property Booking Platform Fullstack Engineer

- Architected and developed an end-to-end platform for property rentals.
- Built frontend with Next.js + Tailwind, backend with Node.js + PostgreSQL.
- Implemented CI/CD pipelines, Docker containerization, and deployment.

Customer Support AI Chatbot for Ethiopian Airlines AI Engineer

- Built AI chatbot with RAG pipelines to provide real-time answers to customer queries.
- Integrated LLM with airline-specific datasets (fares, schedules, policies).
- Designed scalable web app (Next.js + Node.js) with secure backend APIs.

Role-Based Event Management System Frontend Engineer

- Built role-based access UI for event creation, booking, and management.
- Developed reusable React components with Material-UI & Tailwind.
- Ensured smooth API integration and responsive design.

Certifications

- CompTIA Linux+, 2025-01-01
- AWS Certified Cloud Practitioner, 2025-01-10
