Summary

Full-stack Software Engineer with over 6 years of experience building scalable web applications, integrating AI-driven features, and deploying robust CI/CD pipelines. Expert in bridging data, technology, and business to deliver impactful digital solutions across Africa and globally. Proven ability to architect intuitive user interfaces in NextJS while engineering robust backends with Node.js and Python. Passionate about leveraging data and AI for social impact, demonstrated through end-to-end platforms addressing digital identity and policy analysis.

Experience

Research Associate (Software Engineering)

Jan 2025 to Current

Upanzi Network - Kigali, Rwanda

- Integrated AI-powered chatbots into web applications, ensuring seamless interoperability with legacy systems.
- Designed and implemented CI/CD pipelines and containerized applications with Docker for consistent deployment across environments

Frontend Engineer

Sep 2022 to Dec 2023

Better Mobile Security - Remote, USA

- Led a frontend team in designing user-friendly applications, enhancing security, and performance for large-scale
- Collaborated with backend engineers to ensure seamless API integration and maintained high code quality through rigorous peer reviews.

Frontend Engineer

Mar 2022 to Sep 2022

DoubleDice - Remote, Belgium

- Developed and maintained scalable frontend architecture using Next.js and TypeScript.
- Integrated Web3 wallet connectivity (MetaMask, WalletConnect) and smart contract interactions to enable seamless crypto transactions
- Led frontend QA, implementing unit tests and end-to-end testing with Jest

Frontend Developer & UI/UX Designer

Sep 2020 to Oct 2021

MAD Technologies - Ethiopia

- Delivered client websites efficiently by using WordPress and React projects.
- Designed intuitive user interfaces in Figma & Adobe XD.

Skills

- **Cloud & DevOps:** Docker, Kubernetes, Terraform, GitHub Actions, AWS (Certified CCP), Linux (CompTIA+)
- **Identity & Security:** DPI, OpenID Connect
- **AI & ML:** LLM-powered applications, RAG pipelines, OpenAI APIs, FastAPI

- **Backend Skills:** Node.js, Microservices, RESTful APIs, Node.js, PostgreSQL
- **Core Competencies:** React, Angular, Node, DevOps Automation, Software Architecture, CI/CD, Technical Leadership

Education

MSc, Information Technology (Software Engineering & AI) Aug 2023 - May 2025
Carnegie Mellon University Africa, Rwanda

I focused on software engineering, DevOps, and AI with an emphasis on software design, architecture, and scalable systems. My coursework and projects explored distributed systems, cloud-native development, and applied machine learning, combining both research and hands-on practice.

BSc, Electrical & Computer Engineering Sep 2014- Jul 2019
Addis Ababa University, Ethiopia

I specialize in Computer Engineering, with a strong foundation in computer programming, computer architecture, digital logic design, and compilers.

Projects

MOSIP-Integrated Event Management System Frontend Engineer

- Integrate MOSIP-based identity verification APIs, enabling secure biometric and demographic authentication for event attendees
- Built role-based access UI for event creation, booking, and management.
- Built a responsive dashboard using Angular Material and NgRx for state management.

Curricula - AI-Powered Academic Advisor Founder, Fullstack

- Built an AI-powered platform to help students plan academic paths aligned with career goals.
- Implemented CI/CD pipelines, wrote tests, and conducted code reviews.
- Collaborated with advisors and faculty, implementing workflows that streamline student-advisor interactions.

Salon Management System Frontend Engineer

- Designed the UI/UX and implemented frontend in NextJs & TypeScript.
- Built features for booking, staff management, and salon operations.
- Collaborated with backend team to integrate APIs for transactions & payments.

AI-Powered Policy Analyzer Frontend Engineer

- Developed a platform to analyze Digital ID and Data Protection policies across Africa, utilizing RAG pipelines to process unstructured legal texts.
- Designed intuitive dashboards to present complex regulatory data to non-technical stakeholders, facilitating better understanding of National ID frameworks.

Nabayt- Storytelling Platform Fullstack Engineer

- Architected and developed an end-to-end platform for property rentals.
- Engineered secure, token-based authentication flows.
- Established robust CI/CD pipelines using GitHub Actions and Docker to automate testing and deployment, reducing release cycles by 40%.

Customer Support AI Chatbot for Ethiopian Airlines AI Engineer

- Built AI chatbot with RAG pipelines to provide real-time answers to customer queries.
- Integrated LLM with airline-specific datasets (fares, schedules, policies).

Certifications

- CompTIA Linux+, 2025-01-01
- AWS Certified Cloud Practitioner, 2025-01-10
